Technical Specifications

Product Information:

Thickness: 1.25 mm

Standard Size: 1220 mm x 2440 mm

Range: These elegant PVC Laminates come in a wide range of design, colors and finishes.

Adhesive: These laminates are easy to apply with the standard laminating system, including most of the conventional water and solvent based adhesives normally used with plastic laminates. We DO NOT recommend the use of heat activated adhesives.

Lamination: Proper substrates must be used and careful bonding procedures must be observed. Substrates should be of good quality plywood, PVC Board, high-density particle board, or high-quality fiber board. The face of the substrate must be smooth and free of grease, wax, dust, ships and other foreign matter. We DO NOT recommend any kind of coat like PU Base, melamine, lamination (wax) on our products.

Cutting & Machining: These laminates can be cut by using a sharp diamond blade cutter only. We recommend the use of smooth file to feather all the corner edges.

Bending: Kindly use a V-groove cutter to bend the sheets at 90° angle. For any difficulty please contact MOZAIC.

Maintenance: Any cleaning agent containing acids, alkalis or abrasives should NOT be used to clean the laminate. Exposure to sunlight should be avoided.

Note: MOZAIC warrants that all its products are free from manufacturing defects and perfectly fit for use in normal conditions. In case of any claim, the liability of the company is however limited to the cost of the product only. There may be batch to batch color variation.

The sample swatches only represent the designs, colors, and finish. They do not represent the actual thickness.

KINDLY REMOVE THE PROTECTIVE FILM WITHIN 7 DAYS OF INSTALLATION OF LAMINATES

Disclaimer: The laminates in this catalogue may differ in color from the actual laminates.
